

Westfield London – the home of shopping in London

Westfield London is an iconic shopping and leisure centre in London, generating an annual footfall of 28 million people a year to Shepherd's Bush, and creating 20,000 jobs by 2017. It has transformed London's retail landscape, rejuvenated the local area through the improvement and expansion of a key transport hub and changed the way consumers shop through the adoption of new technology. Customers visiting Westfield London are greeted by an exciting and varied retail and leisure experience that entertains millions of customers every year.

Our stores

Westfield London currently houses 265 luxury, premium and high street retailers from more than 15 different countries. We pride ourselves on delivering new and exciting experiences for our customers and have brought numerous leading brands to the UK including American Eagle, Tesla and Kidzania. We also support new and up and coming retailers, hosting various pop-up stores throughout the year.

Westfield London is home to The Village, a luxury mall designed specifically to cater for the growing consumer demand for luxury products. The Village houses nearly 40 high-end luxury brands within a beautiful, boutique-style environment and includes world-renowned retailers such as Louis Vuitton, Prada, Gucci and Versace. Customers visiting Westfield London can also experience its luxury offer through its personal shopping, style advice, hands-free shopping and valet parking services.

Entertainment at Westfield

As well as providing a world-leading shopping experience, Westfield London is a leisure destination for Londoners and tourists alike. Its cinema regularly plays host to some of the world's leading film releases and its in-centre events, such as the ice skating rink and Santa's grotto, are some of London's biggest attractions. We provide a vast array of dining options across the centre ranging from sit down dining to on-the-go options. Westfield London also plays host to the latest music artists, through its Westfield Presents platform that provides spaces and technical support for artists to perform in the centre.

Westfield London expansion

Westfield London has continually invested in the local area, directly delivering jobs and training, footfall, tourism and urban development. The Westfield London extension plans were granted planning consent by the London Borough of Hammersmith and Fulham in September 2014 with the completion of a Section 106 planning agreement and following a unanimous vote in favour of the proposals at the Planning Applications Committee on 4 April 2014.

Delivering over 60,000 sq m of new retail space including a new flagship John Lewis store to west London, as well as new retail and dining experiences for customers, the extension will continue Westfield London's transformative impact on the local area.

Digital innovation

Technology is transforming the way that we shop and at Westfield London shoppers can experience some of the latest innovations in the centre. In 2014, Westfield London became the first shopping centre to launch a click & collect service with a bespoke changing room. *Collect+ @ Westfield* gives shoppers the opportunity to not only pick up their online purchases in a convenient location but also to try them on and return them, there and then. Westfield London also has its own personalised app that allows consumers to interact with the retailers and brands that they like and receive tailored offers and information.
